

inCode is a leading professional services organization that has been providing enterprise solutions, business strategy and telecom technology consulting for progressive companies since 1998. inCode's Enterprise Wireless and Mobility business specializes in designing and delivering wireless and mobility solutions that deliver real business value to our clients and their customers.

inCode creates integrated solutions by combining hardware devices and computing platforms, software middleware platforms and applications, application development and customization, and other services to meet specific business challenges of our customers. Our business professionals and engineers provide business case development, requirements analysis, solution design, hardware and software recommendations, software development, systems integration, solution deployment, and full lifecycle support services. Many of our customers choose to leverage inCode's Mobility Solutions Support Center in Cedar Rapids, Iowa for Deployment and Post-Deployment Support including Staging, Loading, Activation, Asset Management, Spares Management, Helpdesk, Mobile Device Management, and Change Management.

We are looking for a Consulting Manger / Architect to join our Enterprise Group. The successful candidate will lead teams in the technical development of mobility solutions. The role will also require project management, personnel management, and hands-on development responsibilities.

Travel will be required. Relocation will be considered for the right candidate.
