

We currently have openings for two IT Architects in Seattle.

Responsibilities

The IT Architect is senior technical position that requires a strong background in solution engineering and mobile networks. The IT Architect is responsible for working with cross-functional teams to identify and assess impacts to network support systems (OSS/NMS) due to the development of new technologies and on-going network changes.

Required:

- Strong understanding of Mobile GSM & UMTS Networks (RAN & Core)
- Basic understanding of FCAPS in relation to network support systems (Fault, Configuration, Accounting, Performance, Security)
- Experience in system design & engineering
- Understanding of common system interfaces (ODBC, CORBA, SFTP, Webservices)
- Strong communication/presentation skills
- Experience working with and creating Entity Relationship Diagrams (ERD) and Data Flow Diagrams (DFD)
- Understanding of basic Mediation/ETL functions
- Experience with requirements gathering and analysis

Desired:

- Strong understanding of UML
- Experience with Use Case Modeling
- Understanding of database architecture (3NF & Dimensional Data Structures, OLAP, Star Schema)
- Software development experience

Desired Educational Background:

- Bachelor degree in Computer Science, Computer Engineering or Information Systems

If you meet the above qualifications, please send your resume in confidence to careers@incodetel.com with "IT Architect – Seattle" in the subject.
